

Mogha been a leader in spacecraft electronics for over 20 years, providing reliable and durable electronics for civil, NASA, and Military communications systems. Mogha is a leader in spacecraft electronics for over 20 years, providing reliable and durable electronics for civil, NASA, and Military communications systems.

Both the Integrated Avionics Unit (IAU) and Main Avionics Controller (MAC) combine digital C&DH and EPS functions in a single unit. The IAU will be a digital EEE unit in Level-1, -2, and -3 architecture, while the MAC takes advantage of digital in the analog, a multi-stage architecture can be designed. The general, reliable, and flexible Mogha electronics design and manufacturing.

For more information, the MAC and Level-3 IAU are available for your next mission.
